KNOWLEDGE AND SKILLS

Mastery of integration and control of area of organizing the Business processes, coordination of working tasks and their optimal allocation within processes of organization, optimization of human resources and ability of efficient direction to the goals by principles of Project management with consideration of group differences.

Ability and knowledge of business counseling for public Administration. Ability of holistic approach to solving and resolving all problems connected with economical, financial, taxation or managerial matters.

Last 17 years my work is divided among leadership activities and improving of coordination and administration of Costs on Entrepreneurship, Business Operations, life, also in successful pedagogical work.

As deep observer, I studied economy changes, happened in Europe over last 20 years and developed methods and systems for improvement of Business results. Legislation, Documentation, tax evaluation and supervision for each project are carefully analyzed in set up in ideal configuration for each Business.

I am solving finance interest of each project including the possibilities of external investments, inclusion on PHARE, UNESCO, EU funds and other funds of participation, until the negotiation of conditions of financing make investments possible and creation of inventive solutions transform immobilized capital into profitable, advantage, gain. Intelligent solutions sometimes are very simple, but the deep involvement into the situation make hard to the business administration to go out and find the ideal solutions. As economical advisor I touch the point and give the most practical and appropriate solution.

In last years my main field of work is to help local communities to build participative administration, to develop own abilities on a basis of sustainable development, considering social, geographical, economical, logistical, environmental and ethnic characteristics of region.

This presumes also variety of activities, which involve not only local municipality, but also local organizations, NGO and government organizations and organs.

My projects are social engaged and economical successful, have always high social value and echo, as well in media as in Public.
